

HCI RJ45 TCAT6A STRAIGHT JOINT

(RJ45-CAT6A)

Descriptions

RJ45 180 degree shielded feed-through straight keystone coupler is designed for quick installations.

STP coupler is easy to snap into the outlets and patch panels. When requirements are changed, simply disconnect the patch cord and snap out the unneeded keystone coupler. Then snap is a new one and connect the patch cord.

The unique structure provides an efficient and effective method of reducing alien crosstalk from neighboring connectors.
